Country of choice: China
By Alec and Quinn

Reasons for why we choose China

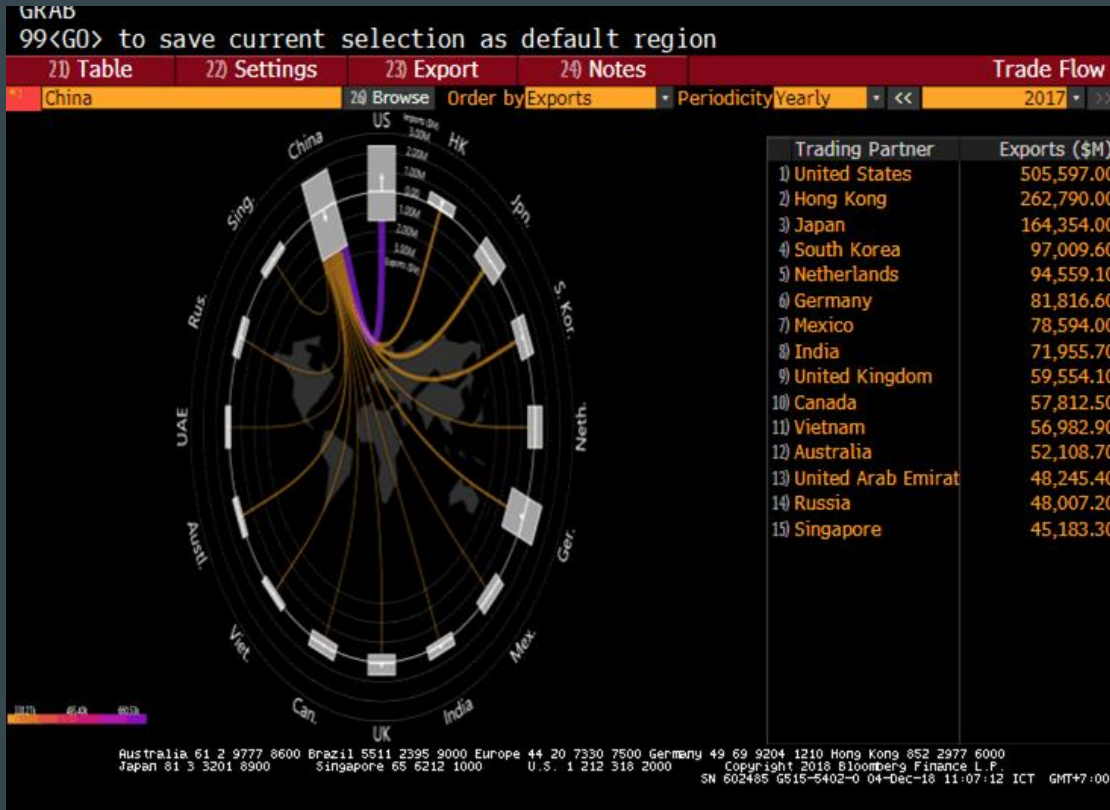

- China is a country with an rapid-growing economy.
- It is the second richest country in the world, behind the USA.
- It is very influential across the world, mainly in the Asian continent.
- China is in the media's “limelight” lately.
- China is in BRICS (Brazil, Russia, India, China and South Africa) and G20.

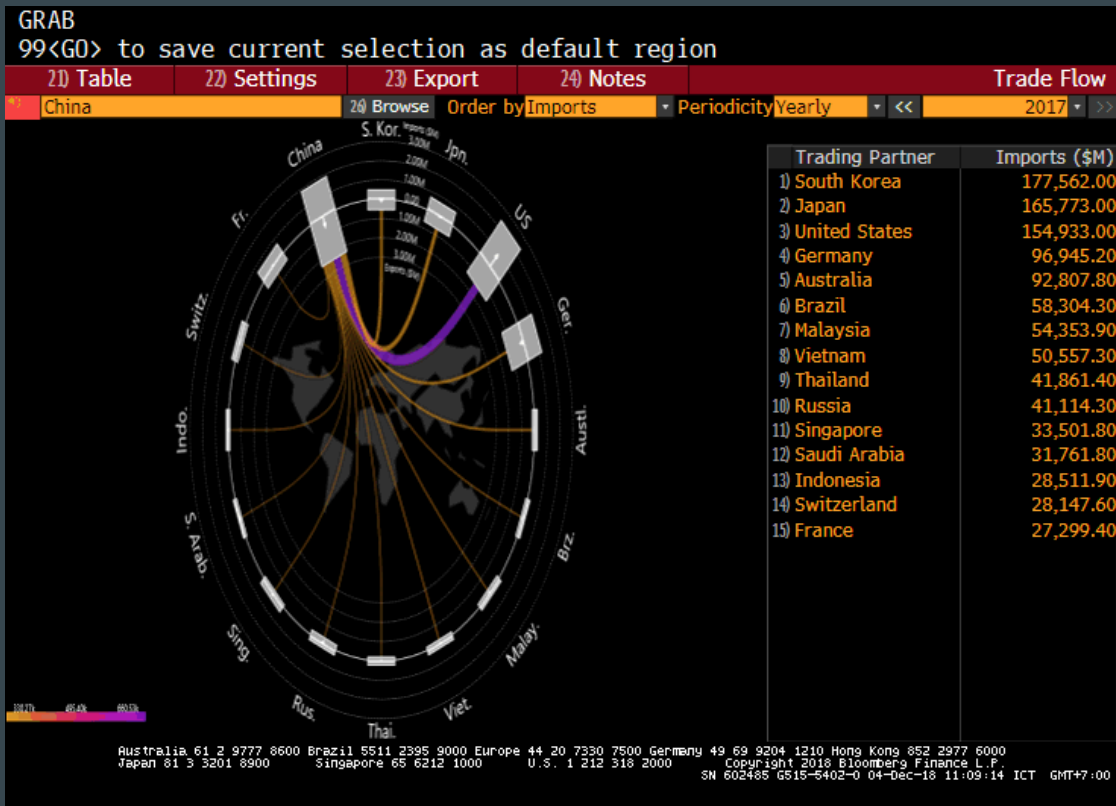

Chinese Exports Levels

These are the list of countries that China trades with the most:

1. United States
2. Hong Kong (S.A.R)
3. Japan
4. South Korea
5. The Netherlands
6. Germany
7. Mexico
8. India
9. United Kingdom
10. Canada
11. Vietnam
12. Australia
13. U.A.E
14. Russia
15. Singapore

Chinese Import Levels

These are the list of countries that China imports from the most:

1. South Korea (possibly electronics).
2. Japan
3. United States
4. Germany
5. Australia
6. Brazil
7. Malaysia
8. Vietnam
9. Thailand
10. Russia
11. Singapore
12. Saudi Arabia
13. Indonesia
14. Switzerland
15. France

HDI Index In China

The HDI index in China as well can see from December 31, 1980 has increased from 0.430 HDI to 0.752 HDI as of the latest data from December 31, 2017.

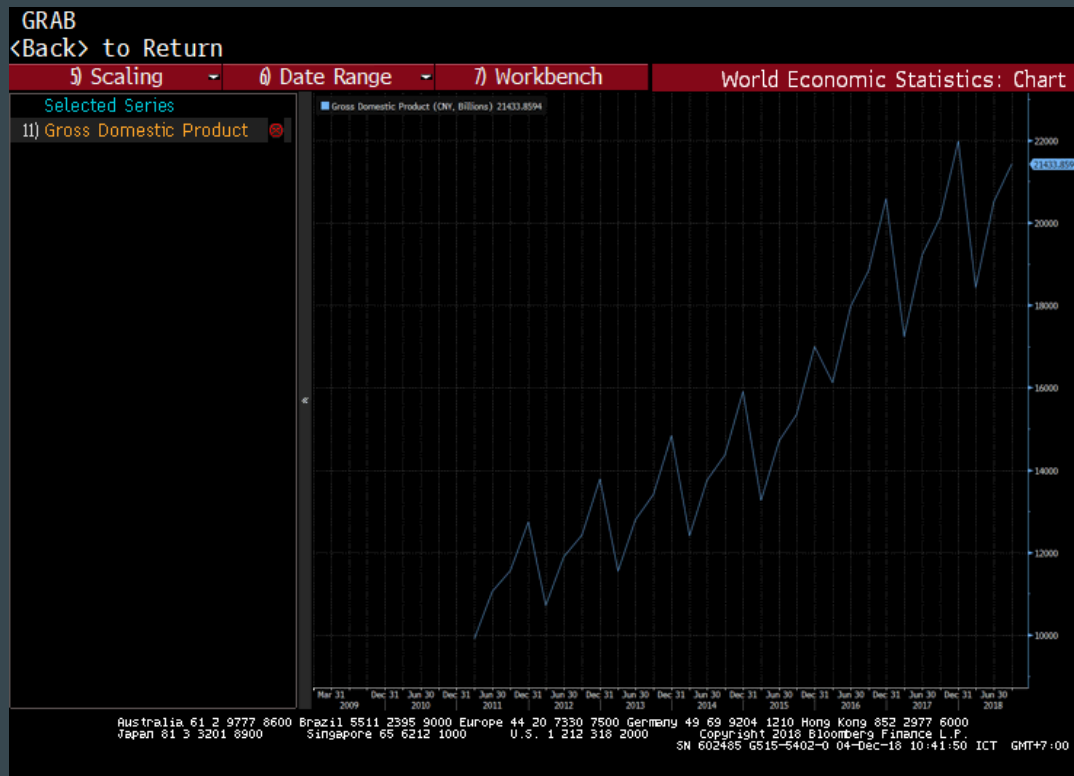

Also we can see a steady increase from 1990 and a start of a rapid increase in 2000.

Unemployment Rate of China

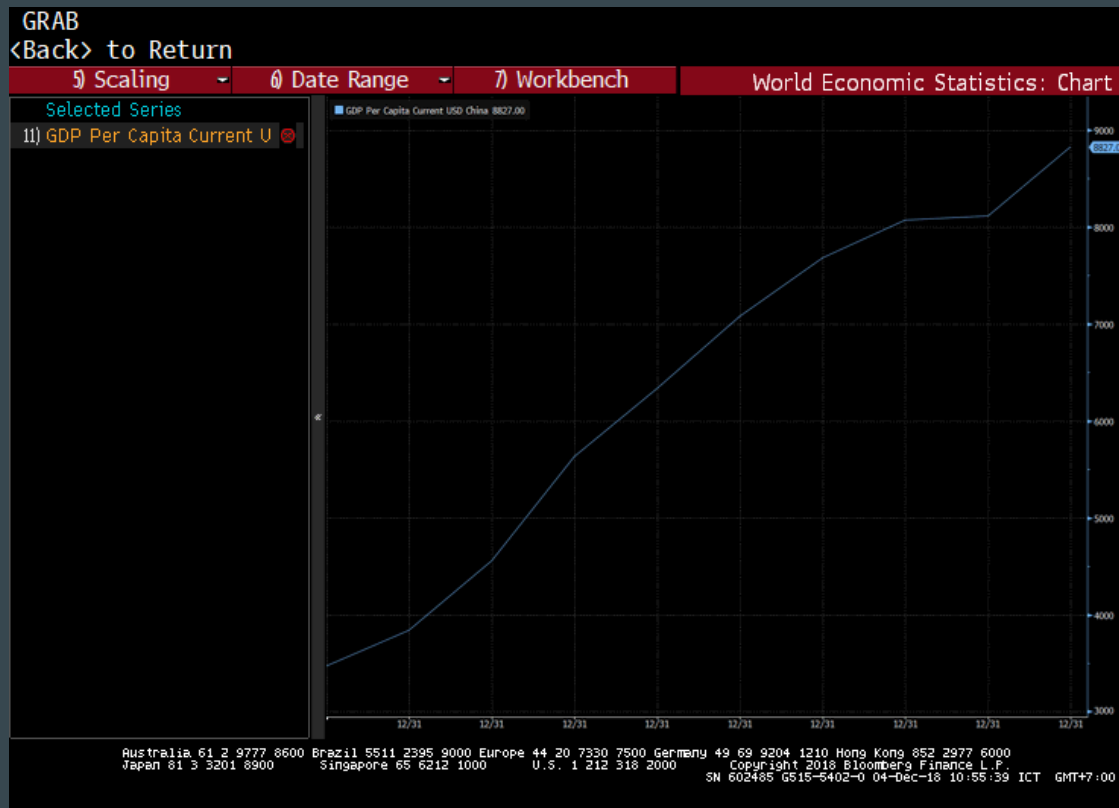

The unemployment rate is the share of labour force that is jobless. This number is expressed as a percentage. As you can see, the unemployment rate has dropped over time since 2009. The rate of unemployment in 2018 is 3.82.

GDP of China

The Gross Domestic Product is a measure of the overall market value of all of the final goods and services produced in a period of time. As you can see, China's GDP increases over the years and its fluctuating. It fluctuates because of the increase and decreases of certain demands. Right now, the GDP of China is 21433.

GDP Per Capita in China

The GDP Per Capita is a measure of a country's economic output that accounts for the number of people within the country. It is measured by dividing the GDP of a country by its total population. As you can see, China's GDP Per Capita increases over time therefore standards of living are higher. China's GDP per capita right now is 8827 dollars per person per year.

Shenzhen Stock Exchanges

This is the Shenzhen Stock Exchange, Shenzhen is named because it is an industrialist city in China, located next to Hong Kong.

We can see a gradual decrease in value in the stock exchange, from 4400 in late January 2018 to 3290.55 in November 2018.

Chinese Yuan to US Dollars

We can see the large increase in the strength of the Chinese Yuan currency compared to the USD. Such as the large increase in strength for the Chinese Yuan in Mid-Late June 2018.

This could indicate the value of the Yuan has risen, which means more Chinese business can buy more for less overseas.
