Internet network system to facilitate learners in accessing learning resources. and the teaching and learning management system of higher education institutions thoroughly and efficiently. (3) Membership of important databases of the world and countries.
Responsible person(s)	IT

Data Disclosure

Below is the data that will be disclosed on the Stamford website.

1.12 Information technology systems for the future

(1) Information technology system for teaching and learning management

Stamford's campuses provided internet access via WIFI network that covers all buildings area in campus. All students, lecturers and employees can secure access to the WIFI network with their own account.

(2) Information technology systems for providing services and facilitating students

Especially the internet network access system service.

With the era of Internet of Things (IOT), information technology systems play a vital part in every enterprise. We have been using our learning management system (Blackboard) for a very long time. And the program keeps updating all the time. As we benefit most from its functions during online delivery. We have Blackboard Collaborate Ultra (BCU) which is the online platform that we use during the online delivery mode during the pandemic. Moreover, all students and STIU associates (staff and lecturers) are entitled to use Microsoft Teams for free which comes together with company's email. We also benefit from the online meeting and online functions from the Microsoft Teams during the pandemic. The Microsoft Teams is always a second plan whenever the BCU system is down.

Our IT support team is very strong. There are glitches system which we can create a ticket requesting IT to solve/fix problems that related to Information Technology. We can also follow up the issue and we will get notification when the problem is solved. TeamViewer is also another tool that our IT support team use during work from home where IT personnel can remote themselves to our laptop and help us fix issues related to software.

We have WIFI available throughout the campus. We can access WIFI and/or wired Internet. Moreover, we can order online printing documents from the campus premises.

There are 2 computer labs, which is enough for class demand. Moreover, we have a Mac lab. For the Mac lab, please see further explanation from Creative Media Design (CMD) major.

(3) Membership of important databases of the world and countries.
